Sanzhar Taalaibek uulu

Head of Innovation Transformation Department

Java / Kotlin Backend Developer

I build systems that bring government services online, and lead the team that does it.

ABOUT

I build backend systems in **Java and Kotlin**. Since June 2026 I have led the Innovation Transformation Department at the **Single Window Center** (State Customs Service of the Kyrgyz Republic).

Since 2023 I have been building government systems people rely on every day: the **103 ambulance service**, customs, import and export permits, and vehicle inspection.

Graduate of Kyrgyz-Turkish Manas University, GPA **3.2 / 4.0**.

3+	5	1,200+
years building government systems	government systems	commits to public-sector projects

EXPERIENCE

JUN 2026 — PRESENT

Head of Innovation Transformation Department · Single Window Center

I lead the modernization of the national Single Window, where businesses get import and export permits online. I manage the department and write code myself.

- Leading the move from the legacy system to a modern platform where new document types are configured without developers.
- Kyrgyz certificates and declarations are sent automatically to the **shared EAEU registry**.
- Online payments, reports and an interface in three languages: Kyrgyz, Russian and English.

Java 21 · Spring Boot · Flowable / BPMN · Axelor · PostgreSQL · GitLab CI/CD

SEP 2025 — MAY 2026

Java Developer · Single Window Center

Built government online services for foreign trade and transport.

- Moved the **vehicle inspection** system to a new platform.
- Public registries of vehicle safety and conformity certificates: anyone can verify a document online.
- QR code document verification service.

Java · Axelor Open Suite · PostgreSQL · S3 · React

JUL 2023 — PRESENT

Java Developer · PetaByte

Building software for government agencies.

- **103 ambulance service**: reports for dispatchers and the senior doctor, crew and vehicle management, links with the 112 line and the Ministry of Emergency Situations.
- **“Sanarip Tamga”** customs system: online transit declarations.
